

INSTRUCTIONS

You can use common wood glue. All parts are cutted precisely that's why they have to be glued exactly.

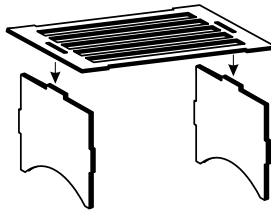

It's easier to colour the parts before mounting. Only for decoration, no toy! Suitable for children older than 5 years. Children under 5 years only under supervision of an adult.

1.) Put a cut resistant plate underneath the sheet of plywood when working with the cutter knife.

Stick through the small paths of the sheet of plywood with the help of a cutter knife from both sides. Put a cut resistant plate underneath the sheet of plywood then working with the cutter knife.

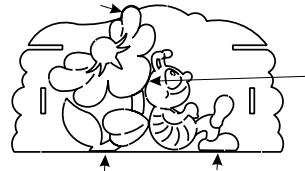

2.) Break out all parts, sand breaking points if needed and colour all parts with the colour you like.

3.) Please glue the flower on the back plate.

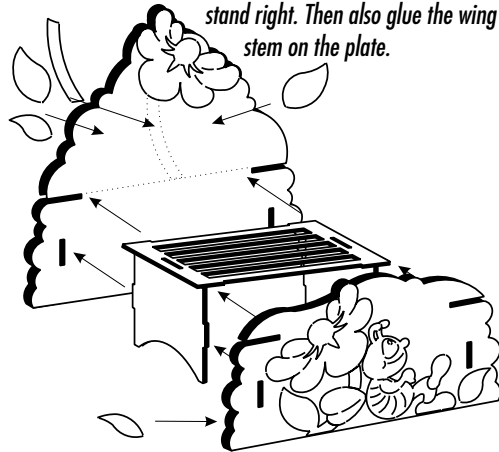

5.) The CD-Grid has to be glued on the side parts.

6.) Now put glue on the slots of the front and back plate and stick the CD-Grid in the middle.

4.) Now you can glue the flower, the bee and the shoe on the front plate. The bee's head and the flower collide. The shoe must not hang over the lower edge because otherwise the CD-Rack will not stand right. Then also glue the wing and flowers stem on the plate.

7.) Then glue the flowers stem in the back and all remaining leaves on the plates. A maximum of 5 CDs can be stored in one CD-Grid.
